

## What is Potwash?

POTWASH is an aluminium-safe, dishwashing machine detergent that attacks food residues left on cookware.

### Key Benefits

- ✓ Fast removal of foodstuffs and soilage
- ✓ Corrosion inhibiting and defoaming
- ✓ Safe for aluminium and overglazed china
- ✓ Works well in hard water

### How Does It Work?

POTWASH is an industrial strength pot and dish washing detergent, designed to be dispensed into dishwashing machines through the Detergent Dispenser Unit. This unit constantly meters the wash water and maintains the correct detergent concentration at all times. POTWASH controls staining and leaves pans spotlessly clean.

### For Use On...

POTWASH is a high-performance detergent that provides excellent cleaning of aluminium, stainless steel and ceramic trays, pots and pans.

POTWASH is also excellent for soak-tank cleaning of greasy aluminium filters as found in range-hoods and cooking fume extraction systems.

## Technical Data

### Composition

POTWASH contains alkaline salts for fast removal of foodstuffs and soilage; builders to soften hard water and suspend dissolved minerals, preventing redeposition on glasses and tableware; defoamers to ensure fast breakdown of foam generate by protein soils in the wash solution and to enable the machine to operate at full pump pressure; sequestrants to condition hard water and corrosion inhibitors to prevent attack of metal surfaces.

POTWASH is safe to use on aluminium ware and over glazed china.

### Properties

COLOUR – Transparent colourless liquid  
ODOUR – Odourless  
pH = 12.5 – 14.0  
FOAM – Low foam, acts as a foam suppressant  
DISSOLUTION – Liquid product blends easily with water

### Dangerous Goods Classification

POTWASH is a Class 8 corrosive liquid.

U.N. No: 1719	CLASS: 8
PACK GRP: II	HAZCHEM 2R

### Environmental Care

POTWASH conforms with all statutory environmental requirements. It is based on safe ingredients selected to perform efficiently so there is no waste or damage. POTWASH is non-flammable, phosphate-free and biodegradable. POTWASH containers will be cleaned and reused if returned to Agar Cleaning Systems Pty Ltd., significantly reducing plastic usage and waste. They can also be recycled.

### Quality

The design, manufacture and supply of all Agar chemical products is controlled by the Agar Quality Management System which is registered and externally audited by SAI Global as complying with the requirements of AS/NZS ISO 9001 "Quality Management Systems – Requirements".

First Certified: 30 April 1996 SAI Certificate No.: QEC7358

### Application

#### Pots and Pans – Machine Use:

POTWASH is designed to be dispensed by the Agar Detergent Dispenser Unit which meters the wash water at all times. Correct adjustment of the Dispenser ensures trouble-free operation and excellent results with pots and pans coming out spotless, sanitised and sparkling.

#### Soak Tank Cleaning:

To clean trays, filters or utensils by the soak-tank method, begin with a dilution of 1 in 100 with water. This concentration should be varied up or down by trial and error to find the most economical concentration that does the job successfully. Soak-times will vary depending on both temperature and the thickness of the film of fat or baked-on food residues.

### Disposal Information

#### 1. Used solutions -

Used Solutions of POTWASH should be poured into a drain or trough that leads to the sewer system or a septic tank. These systems have a method for treating and breaking down the waste. Used solutions of detergent should not be poured into stormwater drains or down driveways as these drains are designed for rainwater and ultimately lead to the local river system.

## 2. Unused product

It is best to keep the product and use it up! If this is not possible, try to give it to someone who can use it. (Make sure the product is in its original, labelled container).

If there is no alternative but disposal, it is safe to pour modest quantities of this product down the drain (to sewer) with running water. Leave the cold tap running for a few moments afterwards as this dilutes the product and reduces the concentration in the wastewater.

Remember, do not mix different cleaning products together during disposal!

## 3. Empty packaging

### Bottles and drums

Our 5L and 20L bottles and drums are made from HDPE (polyethylene) or PET which can be recycled. You can dispose of these containers via the kerbside collection program or other recycling system. POTWASH containers will be cleaned and reused if returned to Agar Cleaning Systems Pty Ltd, significantly reducing plastic usage and waste.

### Cardboard cartons

Used boxes should be flattened and recycled in OCC (old, corrugated cardboard) or mixed wastepaper recycling programs.

Available in: 5L, 15L

Agar Cleaning Systems maintains Safety Data Sheets (SDS) on all its products. These sheets contain information that you may need to protect your employees and customers against health or safety hazards associated with our product. Agar Cleaning Systems recommends that you obtain a copy of the respective SDS sheet prior to using this product. The information in the Product Data Sheet is based on data we believe to be reliable. It is offered in good faith, but without guarantee, as conditions and methods of use of our product are beyond our control.
